

what'cha need?

# **E EK & J E EK**

## creative services

**Eileen Kimble** has been writing, voicing, engineering and producing broadcast promotional and commercial ads for more than 25 years.

She has been all over your television as the voice you never see. You've heard her on video screens at W.H. Smith Bookstores in airports across the country. She's the voice you heard while shopping at Kroger, interrupting your private thoughts as she suggests products on aisle seven.

Her impressive portfolio includes voiceovers for Coke, Home Depot, Ford, AT&T, CNN, and Cartoon Network. Projects include telephone prompts, CD-ROMs, Kiosks and Voice mail Systems. She has been a DJ up and down your radio dial on 96Rock, Star94, FOX97, Z93 and now DaveFM.

Oh, yea... few know that she's been the 'Pollen Lady' for the Atlanta Allergy and Asthma Clinic's Pollen Hotline for over 10 years.

From inception through completion, **Joan Karpeles** handles video and film projects with a thoroughness that reflects her understanding of the production process. All that while maintaining a great sense of humor.

Since 1983 she has been producing national and local TV commercials, PSA's, corporate and educational video's. Along the way, collecting a number of cool awards.

While at BBDO Joan produced million-dollar commercials for Delta Air Lines. How many people can say they've actually made it rain around an L-1011? She got to oversee the special features for "The Powerpuff Girls Movie" DVD and even worked with the big-haired lady on spots for LongHorn Steaks. As executive producer for McGraw-Hill she produced video series that are still being used in schools today. Fortunately they were for elementary schools so she was able to keep up.

At eek & jeek you won't find cameras, editing suites or fancy offices. What you will find are two work loving professionals who have assembled a rolodex of proven players and problem solvers. This allows us to bring together the right team for your project. And it must be working because our roster of returning clients continues to grow each year. So when you call to ask us what we do, we're gonna ask you, "what-cha need?"
